Professional Experience

Philadelphia Gear, A Timken Brand

Sr. Metallurgist, 2012-2019

<https://philagear.com/>

- Lead root cause analysis investigations for internal issues arising on military and commercial orders
 - Facilitated conversations with team members and vendors to determine root causes.
 - Created and guided corrective and preventative action plans within Philadelphia Gear and for vendors.
 - Performed follow-up investigations to verify that corrective/preventative actions were effective.
- Used customer briefs, industry standards, and existing Philadelphia Gear products to find solutions to customer needs.
 - Selected materials for gear units and ancillary parts.
 - Created drawings and 3D models for parts and assemblies.
 - Selected parts and units for new customer applications.
- Involved in internal lean projects
 - Active team member - cleanup and reorganization of shop floor and worker stations.
 - Lead a reorganization of corporate physical documentation.

Powervista Software, Inc.

Technical Writer 2012

- Contracted to review the capabilities of RollCall and write a help manual
 - Revised existing help manual and wrote sections for new product features

Education

CareerFoundry

Certificate in Front End Development for Designers 2019-2020

Certificate in User Experience Design 2019

Online - CareerFoundry.com

- Intensive project-based training program with a focus on user experience design, user interface design and frontend skills for designers.
 - Designed an app concept for curating tattoos. The process included: user research and analysis, wire framing, prototyping, user testing, and iteration. Adobe XD was used for wire framing and prototyping. View project here: [Link to InkWell Project](#)
 - Designed and coded a portfolio website from scratch using basic skills in HTML5, CSS and JavaScript. View portfolio website here: [Link to portfolio](#)

Pennsylvania State University

Bachelor of Science in Materials Science and Engineering, 2008-2012

Happy Valley, PA - psu.edu
